+1 (240) 620 - 5063

<https://pramodoro.com/>

- **7+ years of experience** spanning **research, prototyping, and development** across academia, industry (**Meta, Ericsson, Deloitte**), and cross-sector collaborations (**Adobe Research, Library of Congress**).
- Designs and builds interactive systems at the intersection of **accessibility, multimodal interaction, data visualization, and human-AI collaboration**.
- Combines research, prototyping, and evaluation to translate user needs into implementable product and system directions.
- Background in prototyping data-rich interfaces, accessibility-first interaction design, and user evaluation.

Core Strengths

Multimodal interaction • Accessible UX engineering • Rapid prototyping • Human-AI workflows • Data visualization systems • Mixed-methods research

Technical Skills

Languages: Python, JavaScript, HTML/CSS, SQL, C/C++, Swift, ABAP.

Frameworks & Libraries: D3.js, Vega-Lite, Matplotlib, Flask, Apache Cordova, Web Audio API, Pandas, OpenCV, scikit-learn.

Research and Product: Usability testing, participatory design, interviews, experiments, survey design, heuristic evaluation, and prototyping.

Tools: Git, Figma, Tableau, UserTesting, UserZoom, SPSS, LaTeX, VS Code, Android Studio, Xcode, LLM CLIs.

Accessibility and Multimodality: WCAG, screen-reader-aware design, sonification, tactile interfaces, refreshable braille displays, accessible data visualization.

Experience

Data and Design, LLC, Bentonville, MD, USA | Data Scientist

Jan 2026 - Present

- Analyze badge-in/badge-out mobility datasets across major U.S. metro areas to produce weekly workforce analytics reports and visual summaries.
- Collaborate directly with the CEO on data storytelling, visualization design, and applied research directions for a forthcoming data visualization book and related publications.

University of Maryland, College Park, MD, USA | Researcher

Jun 2025 - Dec 2025

- Led participatory design research with blind and low-vision professionals to shape more accessible access to visual cultural heritage collections for the Library of Congress.
- Evaluated human-AI workflows for semi-automated image description using LLMs, identifying tradeoffs among automation, user control, and output quality.

University of Maryland, College Park, USA | Research/Teaching Assistant

Aug 2018 - May 2025

- Designed and built **TactualPlot**, a multimodal chart exploration system combining touch, sonification, and speech for blind users, using JavaScript, D3, Web Audio API, and tablet-based interaction.
- Extended and evaluated accessible data exploration systems across scatterplots, line charts, bar charts, and pie charts, including experimental comparison between TactualPlot, screen-reader data interfaces, and refreshable tactile displays (APH Monarch).
- Conducted qualitative research on breakdowns and opportunities in human-AI creative workflows for Adobe Research, informing AI-assisted creative tool directions.
- Improved POD-Vis, a clinical visual analytics platform, by designing contextual in-app help, guided onboarding, and usability improvements for complex data interfaces.

- Led a crowdsourced study and contributed to the design of CauseWorks, a system combining visualization, textual narrative generation, and causal analysis workflows.
- Guest lectured on accessible data visualization; served as a TA for Python programming, database design, and data visualization.

Meta Inc., Menlo Park, USA | User Experience Researcher

Apr 2018 - Jul 2018

- Led evaluative UserZoom studies on Facebook App features including Targeted Tabs and Tab notifications, translating findings into product design recommendations.
- Coordinated a cross-functional rolling research program and contributed quantified usability benchmarks through video analysis, audits, and heuristic evaluation.

University of Washington, Seattle, WA, USA | Research Assistant (Remote)

Sep 2017 - Mar 2018

- Designed and conducted controlled studies on motor accessibility for smartwatch interactions.
- Developed an Apple Watch prototype in Swift to investigate accessible alternatives to small-screen touch interactions for users with upper-body motor impairments.

Ericsson, Manchester, NH, USA | User Experience Intern

May 2016 - Dec 2016

- Conducted stakeholder interviews with network planners and engineers to inform workflow simplification and interface feature design for an inventory management product - Ericsson Adaptive Inventory.
- Designed visual analytics concepts, including table and node-link views, for inventory management and engineering workflows.

University of Maryland, College Park, MD, USA | Research Assistant

Mar 2016 - Dec 2016

- Co-led a qualitative study exploring privacy and security perceptions of drones.
- Built an iPad app for user-controlled drone flights, conducted interviews and interaction sessions, and analyzed qualitative data to reveal implications for privacy and policy design.

Deloitte Consulting USA, Bengaluru, KA, India | Application Developer

Jun 2011 - May 2015

- Built SAP-based enterprise workflows and data integration tools across five different client engagements.
- Developed a strong engineering foundation in implementation, stakeholder coordination, and enterprise-scale delivery.

Education

Ph.D. in Information Studies (3.9/4.0)

Aug 2018 - May 2025

University of Maryland, College Park, MD, USA

Advisors: Dr. Jonathan Lazar and Dr. Niklas Elmqvist

M.S. in Human-Computer Interaction (3.9/4.0)

Aug 2015 - May 2017

University of Maryland, College Park, MD, USA

Mentors: Dr. Marshini Chetty and Dr. Leah Findlater

B.E. in Computer Science

Jun 2007 - Apr 2011

Anna University, Chennai, TN, India

Awards and Honors

- Travel Grant for Doctoral Colloquium (IEEE VIS) 2023
- Research Improvement Grant and 2 Travel Awards (University of Maryland) 2017, 2019
- Outstanding Award and 2 Applause awards for Exceptional Work (Deloitte Consulting) 2014

Publications

- For a recent list of publications, please visit my [Google Scholar profile](#).
- Served on organizing committees for the IEEE VIS Workshops on Accessible Data Visualization (2024, 2025, 2026), on the program committee for ASSETS 2026, and as a peer reviewer for leading venues including ACM CHI, IEEE VIS, TOCHI, and more, earning multiple recognitions for reviews.
